Secure-Connect is a cloud-based application for physician practices and anesthesiologist offices to communicate and collaborate with ASCs.

Secure-Connect offers easy online booking of surgeries for physician office. It also enables group texting between physician, anesthesiologist and ASC office with option to access patient chart and share documents easily. All shared documents and messages are automatically archived in the patient chart in Secure-Dox.

Try Secure-Connect with Secure-Dox and find out how it transforms workflow in your ASC. Make it easy for physician and anesthesia offices to do business with your ASC!

WE BETTER THE BUSINESS OF MEDICINE

Key Features

- **Scheduling Surgeries:** Physician practices can either send scanned Booking Sheets or complete online Forms to schedule surgeries in an ASC. Secure-Connect also offers an optional backend service to enter patient data in the Booking Sheets for online confirmation of surgeries

- **Interfaces:** Available interfaces (manual or automated) to add confirmed appointments in your scheduling or practice management software (e.g. HST). It allows practices anesthesiologist offices to see a list of surgeries scheduled at the ASC

- **Chat, Document sharing and Patient Charts:** Two chat options exist in the application for Physician practices and Anesthesiologist offices:
  - » *Patient Chat* - Physician practices can chat on a scheduled surgery
  - » *General Chat* - Engage in chats not related with any specific patient - i.e. chat with the ASC staff. Also, chat feature offers an easy way to exchange images and scanned documents - thereby eliminating the need to fax such documents

- **Seamless Integration with Secure-Dox:** Any documents sent by the physician practice in the patient chat is automatically added to the online patient chart in Secure-Dox. Chat log is also saved in the chart, once the case is marked completed

- **Reminders and Case Management:** ASCs can manage all their cases in the same screen in Secure-Dox. The case management feature is a powerful tool that enables Secure-Dox users to manage communication not only with the physician practices but with patients as well

- **Reminders:** Allows Reminders to be added for each case to ensure compliance

- **Search:** Offers search of all scheduled cases as well as shared documents from patient charts

- **Security:** HIPAA-Compliant, two-factor authentication to access

Benefits

- **Improved Productivity:** It vastly improves case management by streamlining communication and document sharing

- Faxing costs, email tracking and related loss of staff productivity are eliminated

- **Ease of doing business with your surgery center for physician practices anesthesiologist offices.** Streamlined process reduces friction and heartaches on both ends

- **Easy to use and cost-effective** (PC, Mac or SmartPhone). Does not require any software purchase or installation and cumbersome training hours

- **Anytime, Anywhere Access.** Physician practices can schedule and access charts and patient data from any PC with internet access anytime using secure two-factor authentication technology
